Glass, Correction to “Fracture intersections as integrators for unsaturated flow”, *Geophys. Res. Lett.*, 30(7), 1350, doi:10.1029/2003GL016904, 2003.

[1] In the paper “Fracture intersections as integrators for unsaturated flow” by Thomas R. Wood, Michael J. Nicholl, and Robert J. Glass (*Geophys. Res. Lett.*, 29(24), 2191, 10.1029/2002GL015551, 2002) an error appears in paragraph [3] in the third sentence. The corrected sentence follows: At low flow, pulsed flow in the upper fracture was integrated by the intersection, and released into the lower fracture as less frequent pulses of larger volume.
